

BATSONS ENTERPRISES

The image shows a close-up of a yellow, ribbed PVC air hose connected to a white ground support unit (GPU) on an airport tarmac. In the background, the tail and engine of a large white commercial airplane are visible under a clear sky.

About Us

Batsons Enterprises is engaged in the manufacturing and supply of Pre-Conditioned Air (PCA) Hoses and related airport ground support accessories.

The PVC Air Hose business being operated by Batsons Enterprises carries an operating legacy of over 15 years through its predecessor business division under Batsons Industries. Backed by this long-standing industry experience and manufacturing expertise, we focus on delivering durable, reliable, and customized PCA hose solutions designed for demanding airport and aviation environments.

Combining operational understanding with quality-driven manufacturing capabilities, our products are engineered to ensure high performance, flexibility, and long-term reliability during aircraft ground operations.

Over the years, we have catered to the requirements of aviation support companies, airports, and ground handling operators with a strong commitment towards quality, precision, and customer satisfaction.

PRODUCTS

Our aviation support product portfolio includes PCA Air Hoses, Elbow Bends, Hose Reducers, Blower Outlet Hoses, and customized aviation hose solutions designed for various aircraft and airport operational requirements.

We also offer customization capabilities as per specific client and operational requirements, including hose sizes, fittings, reducers, configurations, and other aviation support accessories.
